

Simplify your A1 certification process (for travels within the EU) and provide your employees with a digital end-to-end process for A1 certification without media disruption and with full control

with our

## neylux A1-Manager

Integrate SAP travel request or Concur Request / Concur Travel or SAP FI-TV Travel Request with SAP HCM A1 statements by using our A1-Manager.

Depending on the system, you enter travel requests in SAP or pull data from the cloud using our SAP Concur middleware and directly start the subsequent processing, e.g. emailing and creating the A1 request as a draft. The FIORI mobile app takes the data and automatically activates an A1 application in SAP HCM.

After approval of the A1 certificate, each traveler receives a confirmation email with the corresponding A1 form. This can also be managed in the neylux A1-Manager App at any time.

Even employees without PC access benefit from this process because HR administrators can easily and digitally perform the A1 application for other employees.

| Benefits                                    |                              |  |                                 |                   |
|---|------------------------------|--|---------------------------------|-------------------|
|   |                              |  |                                 |                   |
| Fully automated, digital end-to-end process | Saves costs, time and effort | Full control and transparency without media disruption | Mobile self-service application | Paperless process |
