

neylux® A1-Manager App

Automate your process for the A1 certificate and enable your employees to have an end-to-end digital process

Integrate SAP travel request or Concur Request / Concur Travel or SAP FI-TV Travel Request with SAP HCM A1 statements by using our [neylux® A1-Manager App](#).

Depending on the system, you enter travel requests in SAP or pull data from the cloud using our SAP Concur middleware and directly start the subsequent processing, e.g. emailing and creating the A1 request as a draft. The FIORI mobile app takes the data and automatically activates an A1 application in SAP HCM (SAP User required). After approval of the A1 certificate, each traveler receives a confirmation email with the corresponding A1 form. This can also be managed in the [neylux® A1-Manager App](#) at any time.

Even employees without PC access benefit from this process because HR administrators can easily and digitally perform the A1 application for other employees.

Fully automated process

Digital and paperless

Modern user interface

- ✓ Certified across all SAP Concur Modules (Request, Travel, Invoice, Expense)
- ✓ Unmatched expertise in SAP and SAP Concur
- ✓ Customized solutions through our dedicated Development Team
